

# The Metamorphosis of Cancer

***Feelings of being Isolated in the Mind Propagate to Cells in the Body.***

Cells which lose their ability to Communicate with the rest of the body become Cancerous.

Cancerous cells are the healthiest cells in the body! They are so full of life energy that they keep on multiplying!

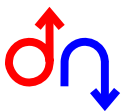

They never receive the signals from the rest of the body to stop multiplying!

People who refuse to communicate with other people are compelled to generate "Non Negotiable" Reasons, and Excuses, why their behaviour is "Perfectly Reasonable", in order to maintain their Isolation.

***The more the Mind feels isolated, the greater the risk of developing Cancer.***

With grateful acknowledgements to Marcus Vitruvius Pollio (c. 80 BC – c. 15 BC) – the Roman author, architect, civil engineer and military engineer, and Leonardo da Vinci.
